

Dear Valued Patient,

At Advanced Care Scripts, Inc. we are committed to providing you with a quality product that arrives in a timely manner and in good condition. We continuously look for ways to enhance our services to sustain that standard.

We have implemented a temperature monitoring program during the summer months to ensure that refrigerated medication arrives within the safe temperature guidelines. The program will include a TransTracker™ indicator within the packaged medication. The indicator provides a color change in the event that the medication is exposed to excessive heat.

The plastic bag with the refrigerated medication will include the TransTracker™ indicator pictured below. This indicator monitors the temperature during the course of the medication's shipment and it will show if the temperature limit was exceeded for a period of time. Please check the temperature indicator in the plastic bag **immediately** upon receiving the medication.

**If indicator
is white
please use
the product**

The appearance of any color change in the window signals temperature exposure above the temperature limit. Please call us prior to using the product.

If you have any additional questions, please call our customer service department at 877-985-6337.

Sincerely,

ACS Team
